

I CLAIM:

1. A litter box, comprising:
 - a tray having a bottom, a pair of side wall and a pair of end walls,
 - an enclosure comprising:
 - a pair of side panels extending above said tray end walls, and
 - a top panel extending between said enclosure side walls.
2. The litter box of claim 1, wherein said tray further comprises a pair of closure flaps foldably connected to said pair of end walls.
3. The litter box of claim 2, further comprising side flaps attached to the sides of said closure flaps and top flaps attached to top edges of said closure flaps.
4. The litter box of claim 2, further comprising:
 - tabs extending from the top edge of said closure flaps,
 - apertures in said enclosure top panel, and
 - said tabs engaging said aperture to retain said closure flaps in an upright position.
5. The litter box of claim 2, further comprising a removable panel in at least one closure flap.
6. The litter box of claim 1, wherein said enclosure further comprises a pair of bottom panels extending along said tray bottom, and a pair of base panels extending along tray side walls, said base panels foldably connected to said pair of bottom panels and said pair of enclosure side walls.

7. The litter box of claim 6, further comprising a pair of bottom flaps connected to each bottom panel, a pair of base flaps connected to each base panel, said base flaps interlocking with said bottom flaps.

8. The litter box of claim 7, further comprising an L-shaped cut in said bottom flaps, an L-shaped free edge in said base flaps, said L-shaped free edge engaging said L-shaped cut.

9. The litter box of claim 1, wherein said tray side walls comprise an inner side wall and an outer side wall, wall flaps attached to said inner side wall and extending along said tray end walls, and wall flaps from opposing side walls interlocking with each other.
